Every aspect of traditional FSIS methods of inspection for slaughter and processing needs to be reconsidered. All methods are subject to change as long as the Agency can fulfill its responsibilities to ensure that the industries produce safe, wholesome, unadulterated and properly labeled meat and poultry products. The Agency is also considering adding methods to better ensure food safety and other consumer protections in distribution channels.

FSIS is seeking comments on the development of new inspection models for slaughter and processing in a HACCP environment. FSIS also invites the public to participate in the development of new inspection models and will hold a public meeting to facilitate that process.
